

## DESCRIPTION

This Agent procedure performs unattended MS Office setup.

It will prompt for an Activation Key if you plan to automatically activate office. You may leave it blank if you plan to activate office later.

By default, the procedure installs MS Office 2021 Standard Volume edition. If you plan to install different edition, please assign appropriate *product edition identifier* to the **OfficeEdition** variable. Available product edition identifiers are listed at <https://docs.microsoft.com/en-us/office365/troubleshoot/installation/product-ids-supported-office-deployment-click-to-run>.

The procedure will also prompt what bit MS Office version you plan to install on 64-bit OS Windows.

The procedure creates configuration file for the *Office Deployment Tool* and leverages it to download and install MS Office. Detailed Installation logs are stored in the system **%TEMP%** folder.

## INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.
2. Upload the Power Shell files to the Shared Files directory of the Managed Files folder: <https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358>.
3. Import the XML into the agent procedure module: <https://helpdesk.kaseya.com/hc/en-gb/articles/229012068>.
4. Execute the procedure on a target machine.
