

DESCRIPTION

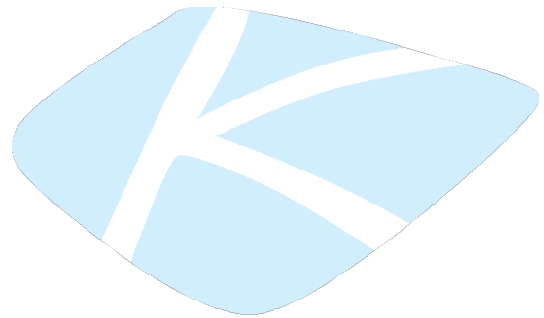

The Agent Procedures sets Internet Security Zone Settings for all users on the system.

The Archive contains Agent Procedure Folder XML-file and the **Set-InternetZoneParams.ps1** PowerShell script.

The PowerShell script is used for setting predefined parameters for the Internet Zone.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.
2. Upload the Power Shell file to the Shared Files directory of the Managed Files folder: <https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358>.
3. Import the XML into the agent procedure module: <https://helpdesk.kaseya.com/hc/en-gb/articles/229012068>.
4. Execute the required procedure on a target machine.
