

## DESCRIPTION

This agent procedure calls PowerShell script that gathers antivirus information and saves results to a Custom Field.

## INSTALL INSTRUCTIONS

1. Create a custom field named **AVInfo** of type **string**: <https://helpdesk.kaseya.com/hc/en-gb/articles/229033728-How-to-Create-and-Update-a-Custom-Field>. If you choose another name, you should change the procedure's lines 18 and 20 accordingly to reflect another field name.
2. Extract the files from the attached zip file.
3. Upload the PowerShell file **Gather-AVInfo.ps1** to the Shared Files/ directory of the Managed Files folder: <https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358>
4. Import the XML into the agent procedure module: <https://helpdesk.kaseya.com/hc/en-gb/articles/229012068>.
5. Execute the procedure on a target machine(s).
