

DESCRIPTION

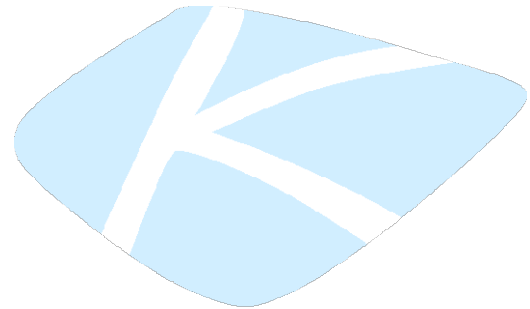

This Agent procedure helps clearing the Printer Queue on an endpoint. Archive contains Agent Procedure file.

Script: This script helps checking the actual queue on the endpoint and then clears if the queue really exists.

Script will send result of execution into Agent Procedure Log and indicate success or failure.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file
2. Import the XML into the agent procedure module: <https://helpdesk.kaseya.com/hc/en-gb/articles/229012068>
3. Execute the desired procedure on a target machine
