

## DESCRIPTION

These sets of agent procedures allow you to force change a local user's password or toggle the user to change password on next login.

## INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.
3. Import the XML into the agent procedure module: <https://helpdesk.kaseya.com/hc/en-gb/articles/229012068>.
4. Execute the required procedure on a target machine.
