

DESCRIPTION

This script sets console lock display timeout on agent's machine for AC and battery power plans.

The script also enables the corresponding option to appear in advanced power settings.

INSTALL INSTRUCTIONS

1. Extract the XML from the attached zip file
2. Import the XML into the agent procedure module: <https://helpdesk.kaseya.com/hc/en-gb/articles/229012068-How-Do-I-Import-An-Agent-Procedure->
3. Execute the procedure on a target machine
