DESCRIPTION

This agent procedures allows to install or uninstall latest version of Microsoft OneDrive.

Installation procedure firstly checks if any version of OneDrive is already installed and if so, executes Uninstall procedure to prepare for the clean install.

Uninstall procedure can be used separately, without installation procedure.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file

2. Upload the PowerShell file **Uninstall-OneDrive.ps1** to the Shared Files/ directory of the Managed Files folder: https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358

3. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068

4. Execute desired agent procedure on the target machine
