DESCRIPTION

The agent procedure clears browsers' data for the most popular browsers: Google Chrome, Mozilla Firefox and Internet Explorer for all users on the computer.

By default, it clears cookies, cached files and history items older than 7 days.

The variable **DaysToKeep** contains amount of days to keep the browsers' data.

The variable **WhatToClear** sets the items that will be cleared. By default, it is set to `-All` to clear cookies, cached files and history items. Alternatively the variable accepts values `-Cookies`, `-TemporaryFiles`, `-History` or a combination of that values divided by space, which instructs the procedure to clear cookies, cached files and history items respectively.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.

2. Upload the Power Shell file to the Shared Files directory of the Managed Files folder: https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358.

3. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068.

4. Execute the procedure on a target machine.
