DESCRIPTION

The following Agent Procedure is intended to gather MS SQL DB Index Fragmentation information on the host and save it as a CSV-file on the VSA server.

Using PowerShell, this procedure prompts for the SQL Server IP address, instance name, and username/password to connect and check for index fragmentation.

This procedure checks any databases that the user has access to that has fragmentation.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file

2. Upload the Power Shell file to the Shared Files directory of the Managed Files folder:
https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358

3. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068

4. Execute the procedure on a target machine

5. Fill in the prompted variables

6. Navigate to the Agent Procedures > File Transfer > Get File page. Click on the agent you ran the procedure against and click SQLIndexFragmentation folder to review results.
