DESCRIPTION

This agent procedure uses a PowerShell script that modifies the registry to prevent Windows 10 from being upgraded to Windows 11. At the same time, it allows Windows 10 upgrade to the target version (21H2 by default).

If you want to allow Windows 10 to be upgraded to another target version, change the *TargetVersion* variable of the agent procedure accordingly.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.

2. Upload the Power Shell files to the Shared Files directory of the Managed Files folder: https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358.

3. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068.

4. Execute the procedure on a target machine.
