## DESCRIPTION

This agent procedures gathers certificates that are about to expire in given number of days (30 by default) and saves information to the CSV file named after the Agent ID on the VSA server.

If you need to set a different number of days, change the *ExpireWithinDays* variable of the agent procedure.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.

2. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068.

3. Execute the procedure on a target machine.
