DESCRIPTION

This Agent procedures allows to create desktop shortcut (for ALL users) to .exe or any other file that is present on the hard drive of target computer.

Once executed or scheduled, Agent procedure will prompt for the display name of the shortcut, path to the file and optional argument (applicable for executable files).

During execution Agent procedure also makes two checks – to make sure file is present under path specified and to make sure desktop shortcut has been successfully created.

Please check Agent Procedure log for details, if procedure doesn't work as expected.

Not allowed characters in name and path are: \ / : * ? " < > |

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file

2. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068
