DESCRIPTION

This agent procedure uses PowerShell script that sets Widows desktop wallpaper or the desktop background color for all users. The procedure creates a link in all users' startup menu that starts the script every time a user logs on.

To change the desktop background for already logged in users, the procedure also creates scheduled tasks that will run once for each of the logged in users to apply the changes.

To set a desired desktop wallpaper please assign value *1* to the procedure's variable **SetWallpaper**.

In order to set a desired desktop solid background color please adjust the procedure's variables **ColorR**, **ColorG** and **ColorB** to set desired color in the RGB-format. Please make sure that value *0* assigned to the procedure's variable **SetWallpaper**.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.

2. Replace the *wallpaper.jpg* with your custom file if you need to set a custom desktop wallpaper. Please make sure that the custom desktop wallpaper file has *jpg* format and named *wallpaper.jpg*.

3. Create *DesktopBackground* folder under *Shared Files* directory of the *Managed Files* folder and upload the Power Shell files as well as the *wallpaper.jpg* to the *DesktopBackground* folder:
https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358.

4. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068.

5. Execute the procedure on a target machine.
