## DESCRIPTION

The Agent Procedures Disables MS Office 2016/2019/365 hardware acceleration for all users on the system, which switches graphics and text rendering duties from GPU to CPU.

The logged in users must log off/ log on for the changes to take effect.

The Archive contains Agent Procedure Folder XML-file and the PowerShell script.

INSTALL INSTRUCTIONS

1. Extract the files from the attached zip file.

2. Upload the Power Shell script file to the Shared Files directory of the Managed Files folder: https://helpdesk.kaseya.com/hc/en-gb/articles/360017878358.

3. Import the XML into the agent procedure module: https://helpdesk.kaseya.com/hc/en-gb/articles/229012068.

4. Execute the required procedure on a target machine.
